

food, medicine, and other humanitarian supplies to the people of Iraq. Under the U.N. resolutions, the equitable distribution within Iraq of this assistance would be supervised and monitored by the United Nations and other international organizations. The Iraqi regime has refused to accept these resolutions and has thereby continued to perpetuate the suffering of its civilian population.

The regime of Saddam Hussein continues to pose an unusual and extraordinary threat to the national security and foreign policy

of the United States, as well as to regional peace and security. The United States will therefore continue to apply economic sanctions to deter Iraq from threatening peace and stability in the region, and I will continue to report periodically to the Congress on significant developments, pursuant to 50 U.S.C. 1703(c).

GEORGE BUSH

The White House,  
February 11, 1992.

## Letter to Congressional Leaders Transmitting the Report on Iraq's Offensive Military Capability

*February 11, 1992*

*Dear Mr. Chairman:*

Under cover of this letter I am transmitting to the Senate and House Committees on Appropriations, the Senate Committee on Foreign Relations, and the House Committee on Foreign Affairs the report on Iraq's Offensive Military Capability required by section 586J(b) of the Foreign Operations Export Financing, and Related Programs Appropriations Act, 1991 (Public Law 101-513).

This interim assessment of Iraq's offensive military capability and its effect on the Middle East balance of power includes an assessment of Iraq's power projection capability, the prospects for another sustained conflict with Iran, joint Iraqi-Jordanian co-operation, the threat Iraq's arms transfer activities pose to U.S. allies in the Middle East, and the potential extension of Iraq's

political-military influence into Africa and Latin America.

The report unfortunately cannot be produced in an unclassified form. I recommend to your attention, however, the January 22, 1992, testimony on Iraqi unconventional weapons capabilities by Robert Gates before the Senate Armed Services Committee.

Sincerely,

GEORGE BUSH

*Note: Identical letters were sent to Robert C. Byrd, chairman of the Senate Committee on Appropriations; Jamie L. Whitten, chairman of the House Committee on Appropriations; Claiborne Pell, chairman of the Senate Committee on Foreign Relations; and Dante B. Fascell, chairman of the House Committee on Foreign Affairs.*

## Appointment of Edward D. Murnane as Deputy Assistant to the President and Director of Presidential Advance

*February 11, 1992*

The President has announced his intention to appoint Edward D. Murnane to be Deputy Assistant to the President and Di-

rector of Presidential Advance. He would succeed Jake L. Parmer as Director of Presidential Advance.

Since 1989 Mr. Murnane has served as Regional Administrator for the Small Business Administration in Chicago, IL. Prior to this, he served as executive director of the George Bush for President campaign in Illinois, 1988; as public affairs director for the Regional Transportation Authority in Chicago, 1984–1988; and in a senior management position in the Reagan-Bush '84 reelection campaign. From 1976 to 1984, Mr. Murnane operated his own political and public relations consulting firm in Chicago. From 1971 to 1976, he served on the Washington, DC, staff of Congressman Philip M.

Crane, first as press secretary and later as administrative assistant and chief of staff. He has also served on the White House volunteer advance staff since 1981 and has assisted on many domestic and international trips for President Bush as President and Vice President, as well as President Reagan and Vice President Quayle.

Mr. Murnane graduated from Northern Illinois University in 1966 with a degree in journalism and political science. He was born on March 2, 1944, in Chicago, IL. He and his wife, Laurel, have three children and reside in Arlington Heights, IL.

## Statement by Press Secretary Fitzwater on the Phaseout of Ozone-Depleting Substances

*February 11, 1992*

President Bush today announced that the United States will unilaterally accelerate the phaseout of substances that deplete the Earth's ozone layer and called on other nations to agree to an accelerated phaseout schedule. Current U.S. production is already more than 40 percent below the levels allowed by the Montreal Protocol and more than 20 percent ahead of Europe's nonaerosol production phasedown.

Recent scientific findings indicate that emissions of these substances, major CFC's, halons, methyl chloroform, and carbon tetrachloride, are depleting the stratospheric ozone layer more quickly than previously had been believed. The President announced that, with limited exceptions for essential uses and for servicing certain existing equipment, all production of these substances in the United States will be eliminated by December 31, 1995. To accelerate progress in the near term, the President called upon U.S. producers to reduce production of these substances to 50 percent of 1986 levels by the end of this year.

Under the terms of the Clean Air Act of 1990, which President Bush signed into law in November of 1990, the administration has authority to accelerate the phaseout of these substances without new legislation.

The President also announced that the U.S. will re-examine the phaseout schedule of HCFC's, and will consider recent evidence suggesting the possible need to phase out methyl bromide.

The President noted that due in large part to the use of innovative, market-based mechanisms such as production fees and tradable allowances, the U.S. has already reduced CFC production 42 percent below 1986 levels, a reduction beyond that required by either the Clean Air Act or the amended Montreal Protocol. The President pointed out that the U.S. has been a leader in reducing CFC's, agreeing to a full phaseout of these gases in February 1989, enacting a fee on their production in November of 1989, legislating the full phaseout in November of 1990, and making the first contribution to a multilateral fund established to assist developing countries in phasing out CFC's.

The President called upon those nations which have not yet signed and ratified the Montreal Protocol to do so, and urged other nations to join the U.S. in accelerating the phaseout of CFC's and other ozone-depleting gases even faster than required by the Protocol.
